# Healthy cooking, every day

Higher base for food that requires longer steaming time.

Place fast-cooking items like tofu and eggs at the top as lower steam temperature is needed.

Place meat or fish at the bottom, as it takes longer to cook and higher steam temperature is needed.

## Conventional bamboo basket

- Food sticks to surface unless lined.
- Bamboo absorbs and uses more water.
- Steam lands on food, rendering food soggy.
- Harmful mould or fungi lurking with hidden moisture.

## Revolutionary Steam It

- Hydrophobic material repels water from steaming surface.
- Ridged to prevent food from sticking.
- Inner grooved perimeter drains water from side into pot.
- Save handling.

Lock in the natural nutrients of your ingredients by steaming.
